

Weber Oaks Street Tree List

Here is a list of trees that are traditionally used in “street tree” plantings:

- ‘Red Sunset’ Maple or ‘Redpointe’ Maple – both cultivars of our native red Maple tree, with good fall color. Both are water loving trees, so therefore would require a fair amount of watering during periods of drought (such as we are in now).
- ‘Autumn Blaze’ maple – a hybrid resulting from the crossing of a Red Maple with a Silver Maple. Fairly fast growing characteristic (Silver Maple) with good fall color (Red Maple).
- Bur Oak – nice upland tree, which is fairly drought tolerant.
- Red Oak – “ “
- Zelkova ‘Green Vase’ – natural substitute for an Elm tree, with Elm-like leaves and structure. Develops an arching canopy over time.
